## INTRODUCTION

Safe Contracting & Services is a First grade company in Oman determined with a vision for providing high quality products and services for all the major industrial sectors in the Sultanate of Oman. Today SCS is at the forefront in every aspect for meeting the demand of the fast growing industry and is fully prepared for delivering high quality construction, products and services to the valued customers in a timely and safe manner.

Since inception SCS had an aspiration to become a pioneer in construction and development. Our patrons have more than two decades of experience in this field. We are backed by a highly professional and experienced team having outstanding track record in the field. We prioritize safety along with quality, timely completion, commitment towards community welfare and progress achieved in harmony with the environment.

We can execute varied jobs in diversified sectors like Oil & Gas, Refineries, Petrochemicals, Fertilizers, Steel & Metallurgical, Chemical, Power, Ship building and other core industries which involves Fabrication, Construction, Erection and Maintenance of Piping, Structures, Boilers, Tanks & Vessels, Reformers, Heaters, Erection of heavy Static & Rotary equipments etc for our customers. Our specializations are in DSS, SDSS, INCONEL, HASTALLOY, TITANIUM, ZIRCONIUM, Cu, Cu-Ni, Ni-Cr, and ALLOY STEEL.

### OUR VISION

To be world's most customer centric company constantly focusing on innovative ideas. We are striving to bring growth to our nationalities and assist our clients to make their dreams come true.

### OUR MISSION

To ensure that our customer should get the best service available in the Industry in order to provide extreme customer satisfaction in its fullest mode.

### OUR SERVICES

1. *Manpower Supply*
2. *Oil & Gas Services*
3. *Constition of pipeline and Fabrication Services*
4. *Plant Piping*
5. *Erection of heavy static and Rotary equipments*
6. *Ship building and maintenance*
7. *Maintenance of Plant Piping and equipments*
8. *Construction of Vessels, Boilers, Heat Exchangers & Tanks*
9. *Hook up Services*

## WHO ARE WE?

At Safe Contracting & Services, we are focused on providing all our services with the highest levels of customer satisfaction – we will do everything we can to meet your expectations.

SCS employee's selection, employee training and periodical inspections are to ensure that our services in your premises will meet your expectation. Our instruction to the staffs involves combination of method of work, which includes hand-on demonstration and printed instruction.

This is to ensure that our workers will be able to execute the task given accurately and confidently.

The system employed to monitor our client's properties and facilities and with our experience enables us to effectively handle the labor demands and the financial requirement of any account we contract. Our personnel management techniques are unique and centered on cost control and provide a quick response to client need as they change throughout the year.

With a variety of offerings to choose from, we're sure you'll be happy working with us. Look around our website, [www.scs-oman.com](http://www.scs-oman.com) and if you have any comments or questions, please feel free to contact us. **We hope to see you again! Check back later for new updates to our website. There's much more to come! (Only for website)**

## OUR MAJOR CLIENTS

## WHY US?

- We recognize our primary asset is people.
- We remain true to our founding values of quality, honesty and hard work.
- We are proactive in finding solutions for our clients that best achieve their goals.

## QUALITY POLICY

At SCS, we know that quality management is a continuous process, involving implementation, maintenance and improvement. Whatever your sector or industry, your business will benefit from a quality management system that brings you into line with international standards.

The Quality Management System (QMS) is that part of our overall business system which implements our Quality Policy, establishes procedures for providing training which meet or exceed learner expectations, and satisfies external quality system requirements. The QMS includes the policies, procedures, organizational structure, requirements and responsibilities for achieving our quality policy.

We plan and manage the processes necessary for the continual improvement of the QMS through the establishment of objectives, the planning of the process, the provision of resources and information needed to carry out the process, the monitoring of related measures needed to assess process effectiveness and efficiency, and the identification/implementation of actions needed to achieve desired results.

We offer audit, certification and training in management systems such as ISO 9001 and targeted training in the application of Lean techniques to improve your operations and optimize the flow of products and services through entire value streams.

Senior Management provides evidence of its commitment to the development and improvement of the quality management system through both words and actions. We ensure that our Mission, Quality Policy, Values, Beliefs and Organizational Culture are understood, implemented, and maintained at all levels of the organization through documented training, regular communication, verbal reinforcement and rewards.

## HSE POLICY

Safety is our first most priority because our people are our top priority. Health, safety and environment (HSE) management from SCS – ensure the health and safety of your workers and compliance with HSE construction requirements. Whether it's a small or large project, we are keen in following the below guidelines.

- Suggest proactive measurements that prevent incidents before they manifest as accidents
- Coordinate all health and safety aspects of your construction project
- Draft health and safety plans and verify any existing or proposed plans
- Comply with all relevant HSE construction regulations and requirements
- Ensure the health and safety of workers, decrease accident risks and improve onsite productivity
- Gain expert advice and recommendations for future safety maintenance and create a long-term safety culture
- Ensure full compliance with EU directive 92/57 EEC
- Safety coordination during the design, fabrication and construction phases
- Recommendations for preventive measures
- Coordination documents
- Safety risk analysis
- Verification and development of health and safety plans
- Internal license controls
- Verification of access permits
- Access controls for designated areas
- Certificate control for cranes and operators
- Control of collective protection
- Control of personnel protection equipment (including helmets, gloves and shoes)
- Determination of transfer/clearing routes

## MANPOWER SUPPLY

Our Manpower Services provides clients with well-trained seafarers and other staff working on specific contracts.

### **Our Objective:-**

To identify the needed manpower at the Clients Structure.

To provide the competent manpower for the Clients according to their defined needs and expectation.

### **Our Manpower Services**

- » Staff Recruitment Services
- » Key manpower and high ranking personnel training & selection
- » Placement of skilled, unskilled & professional personnel with oil & gas companies
- » Training and development of personnel (aptitude tests, oral & written interviews)
- » Recruitment of Technical Partners for all sorts of Companies
- » Technical Manpower Supply including **CEP, Permit Holders, Permit Applicants, Ex Certified Technicians, CompEx Certified Inspectors etc.**
- » Redeployment of personnel
- » Assimilation, Training & Redeployment of Foreign Personnel
- » Negotiation of Contract Terms and Conditions
- » Outsourcing of Personnel
- » Business Strategy Development
- » Obtaining Work Permits for Expatriate staff
- » Company Registration for foreign companies to do business in Oman
- » Market Studies and Analysis
- » Obtaining Operation Permits & Licenses for foreign companies to operate in Oman

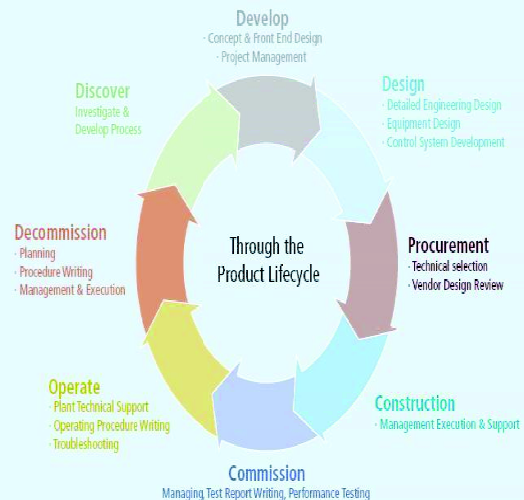

## ENGINEERING SERVICES

Safe Contracting & Services is one of the Oman's leading Engineering Service companies, providing Electrical, Mechanical & Instrumentation services to many of the biggest names in the Chemical, Oil, Gas, Steel, Power Generation and Paper industries. Whatever your requirements, our highly skilled team of electrical consultants and Engineers are at your service. We have experience with a vast range of systems, including lighting and power installations, fire alarms and emergency lighting, LED and energy efficient lighting etc.

Our major mechanical capability, supported by our off-site manufacturing facilities, facilitates the delivery of large, complex, high pressure fabricated piping systems.

SCS are committed to providing **energy efficient solutions**; We have established a reputation of minimizing risk and providing safe, professional, versatile, high quality E&I Engineering services within harsh and often hostile working environments.

### Engineering Services Capability

#### Testing / Maintenance Services

- ✓ Substation Start-up Services
- ✓ Transformers / Oil Analysis
- ✓ Circuit Breakers / Switches / Switchgear
- ✓ Cable Testing Services
- ✓ Vacuum / Gas / Oil Circ. Breakers
- ✓ Motor Control Centers / Starters
- ✓ Emergency Power Equipment / ATS's / Generators
- ✓ Protective Relay Calibration
- ✓ Double Power Factor Testing

#### Repairs / Upgrades Services

- ✓ Circuit Breaker Retrofitting & Rebuilding
- ✓ Circuit Breakers - Air / Oil / Vacuum
- ✓ Obsolete Spare Parts Available
- ✓ Switchboard Modifications & Repairs
- ✓ Solid State Conversions / Trip Units
- ✓ Disconnect Switches / Load Break Switches
- ✓ MCC / Starter Rebuilding & Overhaul
- ✓ Vacuum Retrofitting

#### System Protection & Control

- ✓ Metering & Relaying Design & Installation
- ✓ Auto-Transfer / Restoration Schemes
- ✓ Phase Loss Protection
- ✓ Central Monitoring / Management System
- ✓ Motor Protection Upgrades

#### Power System Studies & Power Quality Services

- ✓ Harmonic Analysis
- ✓ Power Disturbance Analysis
- ✓ Short Circuit & Coordination
- ✓ Power Factor Correction Analysis
- ✓ Load Flow Analysis
- ✓ C.A.D. One-Line Diagrams
- ✓ Protective Relay Applications

## Special Projects on Electrical and Instrumentation Engineering

### E&I Services include:

- Hazardous Area Inspection, Installation & Maintenance as per IEC Standards
- Electrical & Instrumentation Installation & Commissioning Services
- Instrument Procurement, Installation, Commissioning & Maintenance
- Process & Pneumatic Pipe Fitting
- Calibration & Repair
- Inspection and Testing
- Personnel Hire
- Control Panel Design & Build
- Cable Glanding and Termination
- Containment (tray, ladder rack etc)
- Cable Sizing, Procurement & Installation
- Control Panel Design & Build
- Commissioning & Maintenance
- Trouble Shooting equipments

### Our Special Services include:

- Feasibility - Support or development during project definition phases.
- Design - Full "in-house" capability from initial concept to full detailed design (Form EA/EB).
- Project Controls - Complete Project Management and Engineering service including approved CRE and CEM staff.
- Installation- Construction capability including new builds, retrofits and civils interface.
- Test and Commissioning - Full Test and Commissioning service including system testing and "Tester in Charge".
- Competent Engineers - Level A, B & C staff.

### Our Special Experience covers:

- A.C and D.C Substations & switchgear (upto 33kV Single and 3 phase) -Complete modular substation design and build through to individual circuit breaker installation or modification.
- Protection and Control - Design, manufacture and installation of protection schemes including bespoke panel build. Our range includes distance, overcurrent and earth fault, unit schemes transformer and rectifier protection.
- SCADA – Interface, expansion and renewal of SCADA systems including IEC61850 technology.
- Cables – Installation, jointing and terminations of Power Cables.
- Earthing & Bonding – Design, install and test.
- Transformers – Design, sizing, install, test and commission along with gas analysis and oil testing.

### Key Engineering Skills

- Fast Mobilization
- Qualifies Project Management Capability
- Quality and Safety Assurance
- High Skilled Employees
- Timely Completion of Projects

## PIPELINE WELDING & FABRICATION SERVICES

### Pipeline Welding Services

SCS offers pipeline construction in Oman with the industry's highest levels of quality, environmental protection and safety. By utilizing specialized construction techniques, SCS ensures to meet the customers' most demanding scheduling requirements with effective solutions.

We deliver quality work and on-time performance in pipeline construction and welding to help our clients realize a profit.

### Fabrication Services

**Structural steel fabrication:-** We have successfully completed structural steel projects of up to 200 tons. Our company specializes in miscellaneous steel packages, providing high quality work in stairs and railings.

**Industry:** We have served companies in the industrial sector for more than 2 years, including steel plants, cement plants, glass factories, and power plants. We have served numerous customers and companies over the years in large and small scale industrial fabrication and welding, and have gained valuable experience in many different areas to provide customers with the best solutions to their problems.

**Automotive:** We have provided job-shop services direct and indirect to automotive-based customers, performing top-notch commercial welding and commercial fabrication of metal products. Whether you require a simple aluminum tube fabrication for use in food processing equipment, a large custom aluminum fabrication for digital television broadcasting transmission, or even a complex marine aluminum fabrication - our highly skilled team at SCS can service your unique aluminum fabrication needs.

## PLANT PIPING & SHIP BUILDING AND MAINTENANCE

### Super Duplex Piping

We can set new standard to the Welding Industry with our ability for welding 60 inch dia of Super Duplex piping in 9 Hours and with 100% accuracy.

### Boiler Pipeline

We can complete 7000 inch dia. Boiler pipeline (CS, AS& SS 347), of Schedule 100 to 160, within 015 days time.

### Ship Building

In the Mechanical Engineering field, We are backed by an experienced team especially in Ship Construction and Maintenance.

We can do Ship Building Projects in Shipyard to construct Fast Petroleum Vessel and Multipurpose Vessels. We can construct Platform Supply Vessels, Dynamic Positioning FiFi One, PSV Vessels using Ulstein Master Alarm System with full HULL Fabrication & Erection, Piping Fabrication, Erection & Commissioning and construction of Multipurpose Vessels.

In the Maintenance division we can cover the Pumps of most of the system like Ballast, Fresh Water, Fuel Oil, Bilge etc. along with maintenance and overhauling of Lube Oil Cooler, Heat Exchangers, Blowers, Valves, Strainers, Vessels, Boilers etc, Shaft alignment and Propeller maintenance. We can also complete S.T.P revamping jobs.

### We are specialized in using special kinds of metals like:

Duplex Stainless Steel (DSS), Super Duplex Stainless Steel (SDSS), INCONEL, HASTALLOY, TITANIUM, ZIRCONIUM, Copper (Cu), Copper Nickel (Cu-Ni), Nickel Chromium (Ni-Cr), ALLOY STEELS, etc.

We have a team of highly qualified, experienced and dedicated engineers, welders, fabricators, and other technicians, capable of undertaking all types of fabrication / revamping / retrofitting jobs. Our team is competent in handling all kinds of ferrous alloys also.
